

I find that XM service immensely more valuable than even cable services in my home. The Traffic and weather stations on XM, are highly usefull, always available, and not full of commercials, and other distractions. As a driver that spends more than 4 hours a day in my car fighting the Chicago metro area traffic, I can think of no other place I would rather go for this kind of information than XM. I spend my hard earned money for these services, and it simply should not be up to a behemoth like the National Association of Broadcasters to dictate what im allowed to hear. I repectfully request that the FCC reject the NAB's petetion 04-06, and support XM Radios ability to provide the kind of programming that I demand and deserve.
